

Web Sites for Teachers

Creating Quality Web Sites... So You Don't Have To

Great Sites Using Weebly

I strive to provide teachers with great web sites to communicate with their students and parents. I set out to create useful, informative, and up-to-date web sites. This:

- reduces questions to the teachers
- provides another communication method
- consolidates a lot of different information all in one place reducing parental confusion
- puts a wide variety of resources all together

I know teachers' budgets are often limited, so I do all this for a very reasonable price.

I create sites using Weebly which allows you to be in control. You can update your site or you can have me do it, the choice is yours. This allows you to decide whether time or money is the bigger factor for you.

Site Creation – flat fee of \$50

This includes consultation time to determine what content you want on your site, setting up the site, and then the approval process. This takes many hours on my part, but results in a site that is up within days instead of weeks or months and you didn't waste your weekends doing it.

Maintenance – \$20/month*

This makes your web site worry-free. I'll keep it up-to-date, load homework, news letters, spelling lists, photos, and update events. This is an optional service.

Event Calendar – free with maintenance or \$10/month*

As a parent, I want information on school, district, PTA, and class events in one place. There was nothing like that, so I created it. I have set up multiple calendars allowing me to personalize the content displayed on the calendar for your class. Parents will only see events pertaining to their child. Check out my web site for teachers using the calendar. This is an optional service.

Why should you hire me?

- I have many years of professional experience and training in web development
- I'm very knowledgeable in working with Weebly which allows me to work quickly and efficiently
- I've done many of the web sites here at Tony Tobin – see my site for examples
- My pricing is based on my target market – teachers
- Creating and updating your web site is my idea of fun... is it yours? If not, I recommend visiting my site for even more more information
